DETAILED ACTION

Response to Arguments

1. As an initial matter, Applicant's allusion to referring to passwords as "secrets" are noted, however, the Specification does not refer to passwords as merely "secrets." (Remarks, pg. 16, 1st full paragraph) Applicant's arguments are considered in view of the fact that both the Specification and the claims define passwords in the traditional sense, i.e. a string of characters used to verify a user's identity. (Specification, paragraphs 4, 7, 43, 63, 64, 103 and 104). In view of the term as described in the specification and as known to one of ordinary skill in the art, applicant's arguments, with respect to the rejection under Krajewski have been fully considered and are persuasive. The claims of the instant application define a remote user possessing both a first and second password to access a third password, whereby the remote user receives an encrypted key from a target system in response to the user submitting the first password to a target system, whereby the remote user uses an identification, the second password and the encrypted key to obtain the third password from an authorization module, whereby the third password is used to login to the target system. The closest prior art of record, Krajewski, does not disclose possessing and using 2 distinct passwords to gain access to a third password, whereby the third password is used to login to a target system. The prior art rejections under Krajewski have been withdrawn.

Allowable Subject Matter

2. Claims 1-40 are allowed.
3. The following is an examiner's statement of reasons for allowance: As noted above, the prior art does not disclose using 2 distinct passwords, wherein a first password is used by a remote user to retrieve an encrypted key, and using a second key and encrypted key to retrieve a third password, whereby the user is logged into the target system using the third password. Hence, claims 1-40 are allowed.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
